

4. Semester Heritage

Durée

The project title *durée* originates from the French word 'durée', meaning 'duration'. This sense of duration is reflected in the lace, in knowledge, and in the work itself, as well as in the patterns that have been passed down as a heritage. Inspired by the collaboration of women in earlier times, I combine different types of lace in my project and reinterpret them in order to allow this heritage and sense of community to endure and be revived.

i am a brutally soft woman.
